

AGREEMENT

between

ETH Zurich, represented by
Prof. Laurent Vanbever
Computer Engineering and Networks Laboratory (TIK)
Gloriastrasse 35, 8092 Zurich, Switzerland

(hereafter ETH Zurich)

and

Siddhant Ray
Freilagerstrasse 92, 8047 Zürich

(hereafter Collaborator)

concerning collaborations with regard to his/her thesis in relation to his/her studies at ETH
Zurich towards a
Master degree
in the area of
Electrical Engineering and Information Technology

(hereafter Research Area)

Preamble

The Collaborator is acting as a student under the supervision of Prof. Laurent Vanbever and contributing to research and development in the Research Area at ETH Zurich. His/Her collaborations are carried out in the course of his/her studies towards a Master degree.

Research results of students outside the scope of an employment contract with ETH Zurich belong to the student him- or herself. Results of his/her collaborations ("Research Results") may be exploited by ETH Zurich, possibly together with other results that are created at ETH Zurich. To facilitate and to enable a common exploitation of all combined research results, the Collaborator hereby assigns his/her rights to his/her Research Results to ETH Zurich. In exchange, the Collaborator shall be treated like an employee of ETH Zurich with respect to any income generated due to his/her Research Results.

This Agreement regulates the participation of the Collaborator in research and development within the above mentioned Research Area and the rights to the Research Results being created.

1. Collaboration within the Research Area

- (1) The Collaborator agrees to keep all research results confidential as well as other information from the research group of Prof. Laurent Vanbever that is declared as confidential. This obligation to confidentiality shall persist until he/she is informed by ETH Zurich that the intellectual property rights to the research results have been protected through patent applications or other adequate measures or that no protection is sought. However, this obligation will not extend over a period exceeding 12 months after completion of his/her

collaboration with Prof. Laurent Vanbever.

- (2) The Collaborator will make available all information, data and research results out of the collaboration to ETH Zurich.

2. Intellectual Property Rights

- (1) The Collaborator assigns his/her rights to the Research Results, including inventions and works protected by copyright, but not including his/her moral rights ("Urheberpersönlichkeitsrechte"), to ETH Zurich. Herewith, he/she cedes, in particular, all rights for commercial exploitations of Research Results to ETH Zurich. He/She is doing this voluntarily and with full awareness and he/she acknowledges that there are other options to participate in projects at ETH Zurich that do not require such assignment of rights.
- (2) In exchange, the Collaborator will be compensated by ETH Zurich in the case of income through the commercial exploitation of Research Results. Compensation will be made as if he/she were an employee of ETH Zurich and according to the guidelines "Richtlinien für die wirtschaftliche Verwertung von Forschungsergebnissen der ETH Zürich" of 1 Feb 2005. The Collaborator agrees that his/her contributions in the form of software may be published under open source licenses which would forfeit any income and/or compensation due to licensing of that software.
- (3) If a patent application is filed for an invention based on the Research Results, the Collaborator will duly provide all necessary signatures. He/She also agrees to be available whenever his/her aid is necessary in the course of the patent application process, e.g. to respond to questions of patent examiners or the like.

3. Amendments and Additions

Amendments and/or additions of this Agreement can be made in writing, only.

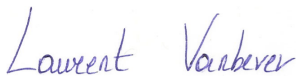

4. Settlement of Disagreements

Should disagreements arise out between the parties, the parties will make an effort to settle them between them in good faith.

In case of failure of these agreements, Swiss Law shall be applied and the Courts of Zurich, Switzerland shall have exclusive jurisdiction.
